Alexander J. B., The chemical composition and ultra-violet excess of G dwarfs 41
Allen, L. R., Hanbury Brown, R. and Davis, J., The stellar interferometer at Narrabri Observatory—I. A description of the instrument and the observational procedure 375
Allen, L. R., Hanbury Brown, R., Davis, J. and Rome, J. M., The stellar interferometer at Narrabri Observatory—II. The angular diameters of 15 stars 393
Anderson, B. and Donaldson, W., Observations of twelve radio sources at a wavelength of 0·73 m with a tracking interferometer having a baseline of 180 000 wavelengths ... 81

Astronomical instruments:

—— On the use of a photomultiplier as a photon counter, *J. F. James* 15
—— The stellar interferometer at Narrabri Observatory—I. A description of the instrument and the observational procedure, *R. Hanbury Brown, J. Davis and L. R. Allen* ... 375
—— The stellar interferometer at Narrabri Observatory—II. The angular diameters of 15 stars, *R. Hanbury Brown, J. Davis, L. R. Allen and J. M. Rome* 393

Astrophysics:

—— On the stability of a self-gravitating fluid layer, *J. L. Tassoul* 1
—— The magnetic field of a contracting gas cloud—II. Finite diffusion effects—an illustrative example, *L. Mestel and P. A. Strittmatter* 95
—— The influence of a magnetic field on Schwarzschild's criterion for instability, *Attay Kovetz* 169
—— Radio spectra and Fermi acceleration by shocks, *P. D. Hudson* 205
—— Exact solutions for oscillating spheres in general relativity, *W. B. Bonner and M. C. Faulkes* 239
—— Studies in radio source structure—III. Inverse Compton radiation from radio sources, *M. J. Rees* 429
Bappu, M. K. V. and Sivaraman, K. R., Emission band photometry of comet Ikeya-Seki (1965f) 151
Basinski, J. M., Bok, B. J. and Bok, P. F., A colour–magnitude array for a region in the core of the Small Magellanic Cloud 55
Baum, W. A., McGee, J. D., Khogali, A. and Kraft, R. P., Stellar rotations observed with a spectracon 303
Bingham, R. G., Magnetic fields in the galactic spurs 157
Bok, B. J., Basinski, J. M. and Bok, P. F., A colour–magnitude array for a region in the core of the Small Magellanic Cloud 55
Bonner, W. B. and Faulkes, M. C., Exact solutions for oscillating spheres in general relativity 239
Caswell, J. L., Observations of H II regions at 178 MHz 141

Celestial mechanics and stellar dynamics:

—— The trojan manifold in the system Earth–Moon, *André Deprit, Jacques Henrard, Julian Palmore and J. F. Price* 311
Clube, S. V. M., The kinematics of Gould's Belt 189

Comets:

—— Emission band photometry of comet Ikeya-Seki (1965f), *M. K. V. Bappu and K. R. Sivaraman* 151
Corrigenda 237
Davis, J., Hanbury Brown, R. and Allen, L. R., The stellar interferometer at Narrabri Observatory—I. A description of the instrument and the observational procedure 375
Davis, J., Hanbury Brown, R., Allen, L. R. and Rome, J. M., The stellar interferometer at Narrabri Observatory—II. The angular diameters of 15 stars 393
Deprit, André, Henrard, Jacques, Palmore, Julian and Price, J. F., The trojan manifold in the system Earth–Moon 311
Dixon, M. E., Spiral arms 337
Donaldson, W. and Anderson, B., Observations of twelve radio sources at a wavelength of 0·73 m with a tracking interferometer having a baseline of 180 000 wavelengths ... 81
